

IPM

Inner Peace Movement®

PRINT MEDIA

The Inner Peace Movement®, has been featured in over 6,000 articles in major newspapers in the U.S. and around the world.

IPM has been the forerunner in discussing and clarifying topics such as dreams, ESP experiences, life after death, guardian angels, life purpose, and the eight universal causes of stress.

Since 1965, Inner Peace Movement® program speakers present with enthusiasm and an inner conviction of broad experience and depth of understanding, helping people to clarify and understand experiences that are considered paranormal.

“There is nothing ‘extra’ about Extra Sensory Perception and everyone is psychic,” according to the founder, Dr. Francisco Coll.

“Only by understanding ourselves and realizing our true, full potential can we be happy and fulfilled in our lives” ...
“By the use of tried and true techniques, a person can learn how to become a leader of oneself and others.”

Las Vegas Sun

“We all have 80-90 psychic experiences every day... A person will have a hunch to call someone. She will hear her name called and no one is there. We're like radio transmitters and can tune into each other everyday.”

The (Trenton, New Jersey) Times

“All psychic gifts add up to one—extra sensory perception or ESP, your sixth sense, just waiting to be tapped. And ESP is not exclusive. Everyone has it.”
